

## Manual N – Commercial Load Calculation Tabs and Highlights

These 1 Exam Prep tabs are based on *Manual N Commercial Load Calculation For Small Commercial Buildings, Fifth Edition*.

Each Tabs sheet has five rows of tabs. Start with the first tab at the first row at the top of the page, and proceed down that row placing the tabs at the locations listed below. Place each tab in your book setting it down one notch until you get to the bottom of the page, and then start back at the top again. After you have completed tabbing your book (the last tab is the glossary, appendix, or index), then you may start highlighting your book.

<b><u>1 Exam Prep Tab</u></b>	<b><u>Page#</u></b>
Table of Contents	xiii
Types of Heating & Cooling Loads	1
Making an Accurate Load Calculation	9
Latent/Diversity	13
Winter & Midsummer Design Conditions	23
Fenestration Procedures	31
Opaque Panel Loads	49
Internal Loads	55
Infiltration Loads	61
Duct Loads	73
Ventilation Loads	87
Air Distribution Loads (Blower Heat)	93
Heating and Cooling Loads for an Office Area	97
Zone Loads for an Office Area	107
What to Do Next	115
Design Conditions for the Full Procedure	127
Fenestration Loads for the Full Procedure	131
Opaque Panel Loads for the Full Procedure	135
Internal Loads for the Full Procedure	145
Infiltration Loads for the Full Procedure	165

<b><u>1 Exam Prep Tab</u></b>	<b><u>Page#</u></b>
Duct Loads for the Full Procedure	175
Ventilation Loads for the Full Procedure	189
Hydronic and Steam Piping Loads	197
Moisture Migration Load	201
Winter Humidification Load	205
Heating & Cooling Loads for a Multi-Use Building	211
New HVAC Plan for a Multi-Use Building	233
Tables	237
Capabilities, Sensitivities and Common Defaults	509
Survey	515
Zoning	519
Trouble Shooting System Design Problems	523
Ventilation Rate	531
Fenestration Performance Ratings and Issues	535
Glossary	541
Symbols and Abbreviations	565
Summary of Equations & Procedures	573
Design Conditions for Month and Hour	591
Software Protocol for Fenestration Loads	597
Software Protocol for Opaque Panel Loads	603
Component Leakage Areas	619
Duct Table Issues and Software Protocol	623
Part Load Analysis	633
Forms and Worksheets	639
Supporting Detail for Advanced Examples	663
Defaults for the Full <i>Manual N</i> Procedure	673
Index	685

**\*\*\*This concludes the tabs for this document. Please continue with the highlights on the next page.\*\*\***
